

HISTORY

Banners N More came into existence the day before 9/11, offering simple wide format digital indoor printing. A year later we introduced cut vinyl outdoor banners. Then came color laser copies, followed by a host of other things -- signs, A-frames, magnets, etc.

As we grew we added an outdoor printer that uses UV ink and can print on flat media and can print full color banners up to 6 feet wide.

We are truly grateful to all our customers that have enabled us to expand by their patience and support through each new venture. We also acknowledge the fact that the Lord has been our Guide and Provider each step of the way.

We also have an internet ministry that we invite you to check out: SpearMinistries.org
